COLLISION PREVENTION PEDESTRIAN/FORKLIFT TRUCK

ON-BOARD AI ✓

SAVE **TIME AND MONEY** ✓

GDRP COMPLIANCE ✓

Detect risk situations to prevent and act!

ECS Safety analyses and detects dangerous situations in real time and warns pedestrians and/or forklift drivers of collision risks.
ECS Safety is non-intrusive, can be fixed to the infrastructure at height and does not require a badge to detect pedestrians.
ECS Safety guarantees a significant reduction in the risk of accidents on your site.

THANKS TO THE ECS SENSOR, YOUR CRITICAL AREAS ARE SAFE AT ALL TIMES !

➤ **Reliable AI:** Ability to analyse a wide range of risk situations.

➤ **Safety for productivity :** Warning only if there is a risk. High reliability to avoid false positives.

➤ **A wide range of warning systems :** Spotlight, audible warning or other visual means. It is capable of acting directly from the infrastructure, even reducing the speed of vehicles.

➤ **Detection of trolleys and pedestrians up to 30 m away without wearing badges.**
